

## Lawn Mower Blade Sharpener

## OPERATING INSTRUCTIONS

### OPERATING INSTRUCTIONS FOR YELLOW HORNET BLADE SHARPENER

**WARNING:** ALWAYS WEAR EYE PROTECTION

#### When Installing Grinder Motor:

The Alignment Decal will show correct alignment.

When Installing Grinder motor there will be a small twist so the back side will be closer to blade rest than front side.

**DO NOT** Align Grinder Disc parallel with Blade Rest.

Have approximately 1/4" less gap at the rear than the front of grinding disc.

Position Grinder Disc Appr. 1/2 to 3/4 " above blade rest.

#### Correct Sharpening Procedure:

Position blade firmly on blade rest aligning the cutting edge with grinding wheel as shown in illustration.

Lowering the blade and pull towards you when sharpening.

Continue this procedure until desired cutting edge is obtained.

Lower blade into grinding disc.  
Begin sharpening here  
Pulling towards you.

Alignment Decal

Picture demonstrates the angle and method to sharpen.

Recommend using a 50/60 grit High Performance Abrasive (Paddle/Flap) sanding disc.
